³ **Revenue tonne** means cargo weight 1000 kg and not exceeding 5 cubic metres in cubic capacity.

Cubic capacity is calculated by multiplying maximum length, width and height of the cargo.

Examples:

- cargo weighing 1000 kg and with a cubic capacity of 10 m³ will be calculated as 2 revenue tonnes.
- cargo weighing 250 kg and with a cubic capacity of 17 m³ will be calculated as follows:

$$(1000 \div 250) \times 17 \div 5 \times (250 \div 1000) = 3.4 \text{ revenue tonnes}$$

Cargo of cubic capacity smaller than 5m³/1 t will be charged according to metric tonne.

DCT Gdansk Standard Tariff

Cargo weighing less than 1000 kg will be counted as 1000 kg. Weight of cargo exceeding 1000 kg will be rounded up to the nearest higher multiple of 100 kg – this rule will be applicable depending on the quantity of cargo ordered for handling within one handling operation.
